

Maths Word Search

Find the maths words in this grid. They can run in any direction — up, down backwards, or even at an angle — but they will always be in a straight line.

- | | | |
|--------|------|--------|
| ADD | FOUR | OVAL |
| CIRCLE | HALF | SQUARE |
| COUNT | NINE | TEN |
| EVEN | ODD | THREE |
| FIVE | ONE | TWO |

When you find all the words, there will be 8 letters left over. Write them into these boxes, in the order they appear in the grid (start at the top left corner, and work across like you are reading). Then you will find the name of a mystery shape!
